 SMARTWATCH REJOV INTELIGENTE	Product Detail 		Use introduction 1. Product overview  2. Physical button function When the screen is off, tap to wake up the screen. Long press to wake up shutdown/function. Click on the main interface to enter the menu function. 	3. Charging instructions - Attach the charger interface to the bottom of the watch, charge it for 5 minutes, or press and hold the button for 3 seconds to activate the boot. - In order to prevent damage to the device during charging, please use a charger with the specified voltage of 5V.  APP download and connection 1. APP download Please download and install the "Gsfit" application in AppStore, GooglePlay or scan the QR code to download. 2. Pairing Please turn on the Bluetooth of the mobile phone before pairing, and then you must perform the Bluetooth pairing in the APP, and the Bluetooth pairing cannot be performed in the mobile phone system. There are two ways to pair: - Click "Add Device" on the "Devices" interface of the APP, and the Bluetooth search interface will pop up. Next, find the corresponding Bluetooth name to pairing. - You can also click Scan Code to connect to the APP and scan the connection QR code on the device to pair.	Function introduction This device has a wealth of function, mainly including the following: - Health functions: heart rate detection, blood oxygen detection, blood pressure detection, sleep monitoring, stress monitoring, one-key measurement, MAI health vitality index, breathing training, health reminders, etc; - Sports function: 100+ sports modes, MET vitality index monitoring, automatic sports recognition, sports data recording, etc. - Others: events reminders, message reminders, etc.  Heart rate measurement: The heart rate detection is automatically detected every 15 minutes by default, and the monitoring frequency can be set through the APP. Blood oxygen saturation detection: The blood oxygen saturation detection is automatically detected once every 15 minutes by default, and the monitoring frequency can be set through the APP. One-click measurement: One-key measurement can measure heart rate, blood oxygen blood pressure, and pressure at one time. when measuring, you need to keep your hands flat on your chest and keep still. Note: This product is not a medical device, and all measured data and result are for reference only and not for medical purposes.
Precautions - The waterproof level of this product is IP67, and can only use it for daily waterproof protection, such as washing hands, raining, Etc. - Do not take it for swimming, diving, surfing, and other water sports. - Do not use it in high-temperature places such as saunas and steam rooms. The high-temperature environment will significantly increase the probability of water entering the watch. FAQ 1. Can not search the Bluetooth of the device in the APP. It is possible that when you connected the device, you linked directly to the Bluetooth of the mobile phone system. Therefore, the connected device needs to be connected to the APP and not join in the phone setting. If the Bluetooth has bound in the phones settings, please unbind in the phone settings first, and then enter the APP to search for Bluetooth to bound. 2. The APP can't synchronize the data of the smartwatch. The Bluetooth wireless connection may have signal interference and others reason, which may cause the link or data synchronization time to be too long. In addition, the Bluetooth of some mobile phones may occasionally be abnormal when starting up. Therefore, it is better to restart the phone's Bluetooth before pairing.	3. The watch cannot be charged. Please make sure that the positive and negative poles of the charging port are not reversed and that the charger is powered on; when the battery of the watch is too low, there will be a period of battery pre-charging time. 4. The time of the watch is not accurate. When the device is fully charged after a dead battery or has not been used for a long time, there may be errors in the time. However, as long as the APP is connected, the time will be automatically synchronized. 5. Heart rate detection will fail or be inaccurate. These conditions may be caused by non-standard wearing methods, such as light leakage due to incomplete fit to the skin, movement of the watch on the skin, wearing the watch too tightly, raising the arm, and making a fist that affects the blood circulation, Etc. These conditions may affect the heart rate measurement. The correct measurement method requires laying your arms flat, relaxing your body, and keeping it still while ensuring that the watch is close to your wrist. 6. Instructions on APP sync data After the device is connected to the APP, the data can be synchronized to the APP for display. When connected to the APP, the APP will automatically synchronize all the device data once; pulling it down on the APP homepage will also synchronize the data. Note: The devices saves data every 15 minutes; the data displayed on the home page of the APP is the real-time data of the device, and the historical data of the APP is the data saved by the device every 15 minutes.	7. The number of steps recorded by the watch is inaccurate or wrong. The following conditions may cause it: - The arm swing amplitude, frequency, and law of the arm swing will have a particular impact on the step count. In addition, the accuracy of the watch's step count is related to the walking posture, walking habits, walking speed, walking continuity, and road conditions. - Please fill in various information correctly in the APP and synchronize it to the watch, including gender, height, weight, age, all of which will affect the step counting algorithm. - In daily life, we often shake our arms or bodies. In some scenes, the shaking is regular, and the watch will misjudge it as walking. - If only a few steps are taken when counting steps and the movement is not continuous, the watch may not record. - The watch does not have a GPS positioning function, so there will be a specific error in step counting in sports mode. For more questions (for example, no message reminder), please check "My"-Questions and Help" in the APP.	FCC Warning Statement Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: - Reorient or relocate the receiving antenna. - Increase the separation between the equipment and receiver. - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. - Consult the dealer or an experience radio / TV technician for help. This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation. The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.	Warranty We are pleased to inform you that purchased product: is covered by a two-year warranty from the date of purchase, as stipulated by Directive (EU) 2019/771 11. And 3 years in Spain: Royal Legislative Decree 1/2007. Art 120 BOE-A-2007-20555 Royal Legislative Decree 1/2007, of 16 November. This warranty covers any manufacturing defect or functional failure that may occur during normal use of the product. In the event of a fault occurring, Marketeam Options S.L. undertakes to repair or replace the product at no cost to you.
